Casey,

Here is a mechanical package for the Palm Vein technology I made reference to.

This version is for a portable version, but provides all the geometry required to morph it into a TurnKey kiosk. I can not open the step file, so I am hoping that engineering provided everything you would need, but let me know in case you do not have everything.

Also, here is a link for the Palm Vein unit itself.

<http://www.fujitsu.com/us/services/biometrics/palm-vein>

Best regards,

Wayne McHugh
